

SITE PLAN

 To the best of my knowledge, this site plan depicts accurate structure placement, distances, roads, driveways, land features, and other pertinent development information for my proposal.

Applicant Signature and Date Signed

SITE PLAN REQUIREMENTS

Draw site plan on the attached grid paper; Site plans must include drawing of the following:

- Measurement of proposed structures to all property lines.
- Measurement from proposed building to critical areas.
- Measurement of the distance between driveway and nearest property line.
- Landowners name and ten digit parcel number.
- North Arrow
- Any driveways, roads or streets and their names.
- All existing and proposed structures and distance between buildings.
- Critical areas (streams, rivers, ponds, wetlands, floodplain, etc.)
- Proposed site of septic or outhouse, drain field and well locations (if applicable).

Disclaimer: This form and review does not vest an application for any type of permit nor is it final approval for any project. Changes in federal, state, or local law, code or rule may invalidate the findings/determinations of this application. Final approval may be given only after a complete application with all attached permits and requirements) is submitted, fees are paid, and final review by the Public Works Department, Health District, Sheriff's Department and Building Inspector are completed and approved.

Note: The application, and all departmental permits and allowances are valid for a period of 12 months from the date received unless otherwise vested by a building or other development/ construction permit.
